

Exciting News!

Paving

BIG things have happened at the camp this past year!

Last summer the camp had three fully accessible, specially equipped cabins, a picnic pavilion, accessible fishing dock, an accessible observation deck, fire pit, and even a fully accessible outdoor chemical toilet, we refer to as a biffy. That is a lot but there is even more to get excited about!

In the early summer of 2016 there was a wonderful group of local business owners who gathered together and paved 80% of the trails at the camp! This was an unbelievable show of generosity that we are still amazed at. The paving improved access and mobility around the camp and has made it possible for everyone to enjoy the nature trails and get from one place to another with ease.

Spring Fever

This spring a new accessible floating wharf, 16'X20' with a ramp to the observation deck, will be launched into the lake parallel to the shore. The new wharf will allow multiple people to enjoy fishing at the same time without getting hooked on each other. A definite bonus!

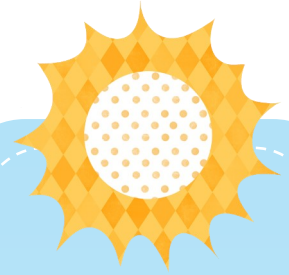

Power

24/7 power is coming to Agur Lake Camp this season!! This is an absolute accomplishment for the camp and we couldn't be happier. One of the barriers during past seasons was the lack of power around the clock but you will no longer be in the dark!

Website

Our new website was launched in March. Check it out at www.agurlakecamp.ca. There is now an on line calendar to check availability as well as a fillable Registration Form! On line payment will also become a reality soon. Make your reservations now, the cabins are filling fast!
